

The Crucifixion Shrine

A memorial honoring a
dedicated friend.

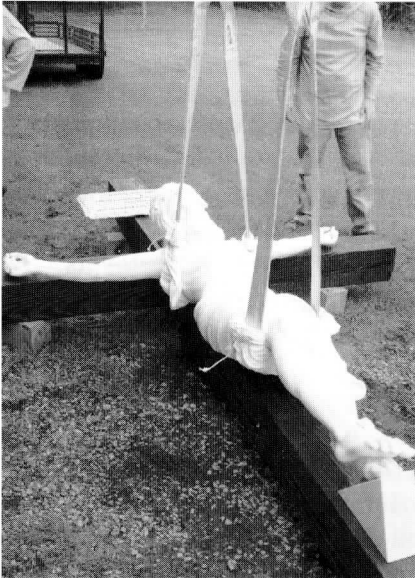

Made possible by a memorial gift.

Ambrose Kenneth Waldeck

1920 - 2006

THE MAKING OF A SHRINE

Taking measurements at the beginning while still at the carpenter shop.

The corpus weights 800+lbs.

Making final decisions as to how to move the very heavy cross.

The more we move around in our senseless and vicious circles, the harder has it become to achieve and maintain physical sense, mental clarity, and spiritual serenity - all of which are totally essential to wholesome creative thought, righteous standards, and **Charity**. Is it any wonder, then, that we, generally speaking, have lost contact with the Spirit of God?

Therefore, a question: **Must we lose hope and become discouraged? No!** Because "All the designs of God that He planned from the very beginning will be fulfilled." He continues to look after His faithful children! "God will keep His promise." And peace will be the end reward - "Peace to **men of good will!**"

Please God grant peace to men who want to be of good will.
